

African fountain grass 'Purpureum'

Pennisetum setaceum 'Purpureum' Also known as: **Purple fountain grass 'Purpureum', *Pennisetum ruepellii* 'Purpureum'**

Rating: 0.0 (0 votes)

This description is for species **African fountain grass (*Pennisetum setaceum*)**:

Pennisetum setaceum or African fountain grass is a beautiful ornamental grass that features upright or gently arching slender blades. The flower panicles range from purplish-pink to ivory in colour. They are elongated and resemble soft bristle brushes. African fountain grass should be planted in areas of full sunlight within loamy or sandy soil that offers good drainage. This is a versatile grass that can be used to good effect in a variety of garden designs. Place it within courtyard gardens or city gardens, it also works well in coastal or cottage gardens. This is an excellent low-maintenance plant for beds and borders or for edging and it can also be grown in containers.
