

African lily 'Lilliput'

Agapanthus 'Lilliput' Also known as: **Lily of the Nile 'Lilliput'**

Rating: 5.0 (2 votes)

This description is for genus **African lily (Agapanthus)**:

The Agapanthus hails from South Africa, and is the family name for a huge range of sub-species. The flowers are generally shades of purple and blue, and are striking in appearance. These bloom during the summer months, and depending on the ones you choose can also be found with flowers of pink or white. A great choice for growing in containers, and being somewhat of a sun worshipper (naturally, being as they come from the glorious South African climate) best thrive in a sunny position in the garden.
