This description is for **annual phlox (Phlox drummondii)**:

Shepherds watched their phlox by night... but their sensational blooms grow best in full sunlight.

Phlox drummondii or annual phlox is an ornamental plant with clusters of flowers that come in a variety of beautiful colours including shades of pink, purple, red and white. Annual phlox can be grown in full sunlight and partial shade. The soil should be fertile with good drainage. When in bloom annual phlox is truly sensational and looks spectacular in a wide range of locations. Plant it within flower beds and borders or alternatively place it in containers so it can be situated in courtyard gardens or on patios. Annual phlox looks just as charming in city gardens as it does in cottage gardens.
