Armenian poppy

Papaver lateritium

Rating: 0.0 (0 votes)

This description is for **Armenian poppy** (*Papaver lateritium*):

The Armenian poppy will add a splash of orange colour to your garden. Unlike an Armenian puppy, which will eat most of it.

Get fired up about your garden by adding a burst of colour with *Papaver lateritium*. This striking perennial is commonly known as the Armenian poppy and features a warm orange hue with rounded and overlapping petals. The Armenian poppy flowers from late spring to early summer and thrives in alkaline soil that is well-drained and gravelly. This plant does well in areas that receive full sunlight or that are partly shaded. The Armenian poppy is a hardy plant that is an excellent choice for use in rock gardens and is a great way to add a splash of vividness to your garden design.
