Austrian Clematis 'Constance'

Clematis alpina 'Constance'

Rating: 0.0 (0 votes)

This description is for species *Austrian Clematis (Clematis alpina)*:

The Austrian Clematis is a delightful plant that sports drooping purple blooms during the springtime. During the autumn it becomes covered in fluffy seed heads. It's a climbing plant so looks fabulous grown up a trellis or wall, but does like a full sunlight or partially shaded position to best thrive. It can also be successfully grown in pots or containers. Clematis alpine is a hardy little number that can cope with the worst weather that Mother Nature sees fit to throw at it, making it especially suited to growing in the UK.
