# Autumn Daffodil

*Sternbergia candida* Also known as: **Autumn Crocus**

Rating: 0.0 ( 0 votes)

This description is for **Autumn Daffodil (Sternbergia candida)**:

Producing a truly beautiful, pure white blossom each spring, *sternbergia candida* is one of the most talked about bulbous flowering garden plants around. In truth, it is quite rare to find, so they are highly prized. Known as the autumn daffodil, its thick, narrow, grey-green foliage grows like stems directly from the ground in winter. Its lightly scented flowers are stunning to view, with six oval milk-white petals with yellow-tipped stamens in the centre. The autumn daffodil hates winter wet or harsh cold, so growing under glass is preferred. Transplant in summer to well-drained soil in a sheltered area. Perfect for beds, borders and rockeries.
