Bell Heather

Erica cinerea f. aureifolia

Rating: 0.0 (0 votes)

This description is for **Bell Heather** (*Erica cinerea f. aureifolia*):

You can ring all your friends to tell them you've planted a bell heather.

Erica cinerea f. aureifolia is a Bell Heather that has wonderful ever-changing foliage that adds interest to the garden on a year round basis. During the spring and summer its small, needle like leaves are a green-yellow shade. These gradually become flushed with orange during the autumn and winter. It also sports pretty flowers during the summer months. It's a great choice for a UK plant, as it can cope with the very worst of Mother Nature's fury. Easy to grow and requiring little on-going care, it's a wonderful addition to a low maintenance garden.
