This description is for **Bellflower (Campanula excisa)**:

The distinct purple flowers of campanula excisa or incised bellflower are eye-catching in any garden design thanks to their shape, which resembles a bell with cut-away sides. Incised bellflower does well in moist and fertile soil that has good drainage and it appreciates a sunny spot. This plant offers a very pretty means of enticing birds, butterflies and bees into your outdoor space and it brings incredible colour and shape to a rock garden. However, it will also grow in a container, enabling you to position it within a courtyard garden or on a deck.
