

Bieberstein's crocus 'Conqueror'

Crocus speciosus 'Conqueror' Also known as: **Large autumn crocus** 'Conqueror'

Rating: 0.0 (0 votes)

This description is for species *Bieberstein's crocus* (*Crocus speciosus*):

Crocus speciosus is a lovely little perennial flowering bulb that blooms during the autumn. *C. speciosus*, often called bieberstein's crocus, produces lilac-blue flowers with a silvery tinge. Petals are also veined with dark purple to intensify the blooms. Bieberstein's crocus should be planted in full sun and grown in gritty and infertile soil. This prevents bulbs becoming too wet and rotting. It's perfect for growing in containers and rockeries, but can become lost when placed within an herbaceous border because many other autumnal plants are still growing, dwarfing this plant.
