Black-eyed Susan 'Goldsturm'

Rudbeckia fulgida var sullivantii 'Goldsturm' Also known as: **Coneflower** 'Goldsturm'

Rating: 0.0 (0 votes)

This description is for species *Black-eyed Susan* (*Rudbeckia fulgida var sullivantii*):

What makes *Rudbeckia fulgida var sullivantii*, or Black-eyed Susan, so popular is not just its low maintenance and cheery appearance, it's also the fact that its clumping nature and fast growth means it takes little time to see a blanket of gold in your garden. The sight is quite magnificent, with its tall, mid-green stems blooming in summer with sun-flower-like blossoms. It thrives in moist to well-drained soil, and is an aggressive spreader, so it's ideally suited as groundcover for large informal gardens, or on slopes and embankments
