

Blue Anise Sage

Salvia guaranitica Also known as: **Brazilian Sage, Giant blue sage, Sapphire sage, Anise-scented sage, Salvia concolor**

Rating: 0.0 (0 votes)

This description is for **Blue Anise Sage (Salvia guaranitica)**:

It would be difficult not to be taken by *Salvia guaranitica*. A bushy subshrub with foliage that has a refreshing, light green colour and aniseed scent, it is a highly popular option for borders or in informal gardens. But it is its brilliant blue flowers that it earns its reputation from. Known as the Blue Anise Sage, it offers a magnificent display when producing large, two-lipped blossoms on erect stalks. Plant in moist, modestly fertile or humus-rich soil in a sunny location, and since tender in its early years, it may need shelter and support. For pruning, deadhead faded flowers regularly.
