Blue Geranium

Geranium pseudosibiricum Also known as: **Crane's bill, Geranium**

Rating: 0.0 (0 votes)

This description is for **Blue**

Geranium (Geranium pseudosibiricum):

Your eyes are ok. This geranium's actually blue.

Geranium pseudosibiricum, or Blue geranium as it's often known, is a perennial plant that's found at forest edges, in mountain grassland and on flooded plains. Blue geranium flowers in summer with deeply-veined purplish-blue petals. Blue geranium is best planted in a sunny or partly shady spot that has well-drained soil. Whilst it can survive short periods of drought, it prefers a moist soil, which is more akin to its natural habitat.
