Brewer's weeping spruce

Picea breweriana Also known as: **Brewer's spruce**

Rating: 0.0 (0 votes)

This description is for **Brewer's weeping spruce** (*Picea breweriana*):

Garden design can be tough but there's no need to weep with frustration if you introduce picea breweriana or brewer's weeping spruce to your outdoor space. The marvellous texture and appearance of this mid-sized tree will brighten your mood instantly. Brewer's weeping spruce has a roughly conical shape with drooping needle-like foliage that is dark green and it produces cones in shades of brown to purple. This tree likes moist sandy, loamy and clay soils that offer good drainage. Grow it in a location that receives full sunlight and somewhere where its dramatic appearance can be displayed to perfection, for instance as a standalone feature in a lawn where it will draw many intrigued garden visitors who will find it hard to resist running their fingers through its alluring dense foliage.
