**Phlox carolina is commonly known as carolina phlox. Not just by the dyslexic.**

Phlox carolina is commonly known as Carolina phlox. This eye-catching plant has slender upright stems and produces beautiful clusters of white, pink or purple flowers during summer. Carolina phlox is suited to areas of full sunlight or partial shade within most types of soil including loamy, sandy, chalky and clay as long as it is moist and offers good drainage. This charming plant adds elegance to flower beds and borders and also serves as an attractive choice for underplanting. Carolina phlox looks just as lovely in city and courtyard gardens as it does in cottage or informal garden designs.
