Darwin's Barberry 'Compacta'

Berberis darwinii 'Compacta' Also known as: **Barberry 'Compacta'**

Rating: 0.0 (0 votes)

This description is for species **Darwin's Barberry** (*Berberis darwinii*):

Darwin's Barberry is a beautiful shrub that becomes festooned with dark orange flowers during the spring. Easy to grow, it's a perfect choice for the novice gardener or those looking for a low maintenance garden. It is quite slow growing and can take up to 20 years to reach its full potential. After it's flowers fade it then boasts blue-black fruits, meaning it provides a delightful, ever-changing vista throughout the year. *Berberis darwinii* is great for hedging or screens, or as ground cover, and it enjoys either a full sunlight or partially shaded position.
