# Lobel's maple

*Acer lobelii* Also known as: ***Acer cappadocicum subsp. lobelii***

Rating: 0.0 ( 0 votes)

This description is for **Lobel's maple** (*Acer lobelii*):

**Lobel's maple does require lots of pruning. It's also rare and endangered, so take care with those secateurs!**

*Acer lobelii* or Lobel's maple grows tall and narrow, great if you have a narrow spot to fill. It's a fast growing tree that will reach around 15m in height. It is native to Southern Italy, where it is now considered to be an endangered species. *Acer lobelii* was introduced to the UK back in 1683. It grows in most types of soil. The leaves are dark green and turn a bright yellow in the autumn. It has small yellow/green flowers and winged fruit.
