Rating: 0.0 (0 votes)

This description is for **Pallas thyme** (*Thymus pallasianus* subsp. *pallasianus*):

With its enticing citrus-fragranced leaves and pink flowers, *thymus pallasianus* subsp. *pallasianus* or pallas thyme is a treat for the senses and if grown amongst paving stones or similar areas it will attract many visitors keen to enjoy its fragrance as their footsteps release the foliage's scent. Pallas thyme likes relatively fertile soils that are well-drained and should be grown in a sunny position. This plant is very pretty for edging purposes and also makes a groundcover well worth pausing for and appreciating during garden strolls. Its preference for average soils also makes Pallas thyme an attractive contender for pride of place in a rock garden.
