

Tibetan cotoneaster

Cotoneaster conspicuus

Rating: 0.0 (0 votes)

This description is for *Tibetan cotoneaster (Cotoneaster conspicuus)*:

As conspicuous as a Tibetan monk wandering around your garden.

Cotoneaster conspicuus, often called Tibetan cotoneaster 'Decorus', is a mid-sized evergreen. During the spring, *C. conspicuus* develops lots of small white flowers, which turn to bright red berries in the autumn. Tibetan cotoneaster's tiny leaves are dark green and glossy, providing great winter cover. *C. conspicuus* is best grown in full sun or a partially shady spot that has well-drained soil. Though it is relatively hardy, it may need a little protection from cold winds in exposed locations. It is ideal for use in gardens needing winter colour, and for covering exposed walls or trellising with greenery.
